

## GP Liaison

We are delighted to organise consultant speakers to present GP educational training at your practice, TIPs or any other educational event at a time to suit you.

If there is a specific topic not listed please do let us know as this can usually be arranged for you. We will provide lunch and equipment if required.

For more information please contact Julie Deadfield:

07387 262 516

## Consultant and GP Testimonials

"I have been always very keen in educational programmes and teaching. It is fulfilling and rewarding. I feel fortunate to have presented at many education events over the years. I have always enjoyed the opportunity to present and discuss my speciality and the innovations in shoulder surgery that we introduced at the Reading Shoulder Unit with GPs, therapists and nurses. It is always nice to meet the people behind the names on the referral letter. It helps to highlight the community in which I work and create better communication channels between us. Over the years, we have introduced many innovative treatments in shoulder surgery followed by some significant shifts in managing and treating various conditions. Having a friendly forum to discuss challenges and answer questions is insightful and enjoyable. As well as answering questions, it is also an opportunity for me to learn from my colleagues about their experiences and priorities, highlighting for opportunities to improve my service."

**Professor Ofer Levy, Consultant Orthopaedic Surgeon - Reading Shoulder Unit**

"For a number of years we have run a successful monthly education meeting at our surgery with support from Berkshire Independent Hospital. Consultants present topics relevant to general practice and of our choosing. As well as keeping our GPs and nurses updated in a wide range of specialities, it has given us the opportunity to get to know our local consultants and also to discuss difficult cases. These meetings are well received, and being surgery based with lunch provided, allows us to fit this in to our busy days."

**Dr Lee Chivers, Loddon Vale Surgery**
