Non-surgical Treatments Price List 2024

Intense Pulsed Light (IPL)

This treatment is excellent for treating facial veins, haemangiomas, acne rosacea and pigmentation. The energy used, timing and wavelength are adjusted to suit individual requirements. A course of treatments may be necessary to achieve the desired result.

Face: **£220** (30 minute session)

Hands: **£100** (15 minute session)

Individual spider naevi: **£80** (15 minute session)

Please note: It is not possible to treat patients with a sun tan or fake tan.

Microsclerotherapy

This is a treatment is for thread veins using a sclerosant to destroy broken capillaries on the legs. We will examine your legs and possibly use a duplex machine to scan them. It is important that any varicose veins are treated first to achieve a good result. A discrete area is tested and left for 10/14 days to see that it is suitable. Timing is important as the legs will look worse for 6 weeks after treatment. It is advisable to avoid running, rowing and pedalling for a week after treatment.

£100 (consultation & test)

£220 (30 minute session)

Pelleve

This treatment uses radio frequency to warm the skin at a deep level to encourage collagen production.

£200 for a session (approx. an hour)

Please note: Unable to treat patients with a connective tissue disease or pacemakers.
